MEET VIRTUALLY

VIRTUAL EVENTS, *human* CONNECTION

PRESENTATION TOOLS

Participants have access to a range of presenter tools with support for file sharing, .ppt/pdf/image upload, screen sharing, laser pointer and event video casting in the 3D world.

CAREFULLY DESIGNED ENVIRONMENTS

From massive auditoriums for keynotes to small offices for one-on-one meetings, Kasama offers thoughtfully designed virtual spaces that can be configured to support your event's needs.

AVATAR INTERACTION

In Kasama users interact as customisable avatars. Instead of video chat tiles that remind everyone that they are in separate places, avatars feel together in the same environment. Your avatars can interact via voice conversation, text chat and playful animations.

SCALABLE

It's tough for lots of people to come together online and really feel "present" with each other. In Kasama, global scale doesn't come at the expense of togetherness and a feeling of presence. Kasama supports thousands of simultaneous users.

SUPPORT AND TRAINING

We work closely with your event organisers, presenters, and participants to ensure that they know how to use Kasama. We also provide support during the event to ensure that it runs smoothly.
